Reflection is the bridge between experience and learning. By taking time to reflect, we allow ourselves to process our experiences, understand our actions, and discover the lessons they hold. This practice of introspection is not just about looking back, but about moving forward with greater insight and intention. Through thoughtful reflection, we transform our understanding, enrich our practices, and cultivate a mindset of continuous improvement. It is in these moments of reflection that we truly grow, both as individuals and as educators, creating a positive impact on the lives of those we guide and nurture . - Rachel Smith
